|  | “Classic 2nd Edition”          | “Commercial Edition”                           |
|--|--------------------------------|--|
| Plant monitored by   | Plant owner                    | Installer / Portal Operator / Service Provider |
| Annual fees  | With costs, up to 30 kWp* free | With costs                                     |
| Plant registration   | Online: solar-log.com/classic2 | Online: Portal operator                        |
| <b>Basis functions</b>   |                                |  |
| Yields per kWp (specific yields)   | ●                              | ●  |
| Event log (error/status messages from the inverters)                                       | ●                              | ●  |
| Data sheet with the essential information and plant image                                  | ●                              | ●  |
| Performance comparison of the individual inverters and strings                             | ●                              | ●  |
| Data and fault messages via e-mail   | ●                              | ●  |
| Compatible with Solar-Log™ APP for iOS, Android and Fire OS                                | ●                              | ●  |
| Compatible with Solarfox® large external display   | ●                              | ●  |
| Standard transfer intervals: 30 min, 1 h, 2 h, 4 h, 8 h, daily                             | Only standard                  | Standard plus every 10 or 15 min               |
| Number of e-mail addresses for performance / fault messages                                | 2                              | 4 addresses per category                       |
| Simple configuration - with Easy Installation  | ●                              | ●  |
| <b>Monitoring &amp; Management</b>   |                                |  |
| Centralized and concise monitoring of several plants at a glance                           | -                              | ●  |
| Remote configuration of the Solar-Log™   | -                              | ●  |
| Plant log book with ticket system and task assignment                                      | -                              | ●  |
| Central plant data administration (location, owner, inverter, information and module data) | -                              | ●  |
| User administration and individual access rights   | -                              | ●  |
| Yield overview with specific yields from all plants / inverters                            | -                              | ●  |
| Timeline (protocol of all configuration changes)   | -                              | ●  |
| <b>Portal design</b>   |                                |  |
| Page layout with precise color selection and customized logo                               | -                              | ●  |
| Custom page design due to flexible Content Management System (CMS)                         | -                              | ●  |
| Application as platform for promotional activities and customer relationship               | -                              | ●  |
| Configuration wizard to design the web pages   | -                              | ●  |
| Easily customized contact form   | -                              | ●  |
| Additional language options  | Only the server language       | ●  |
